WITec Paper Award

The annual WITec Paper Award recognizes exceptional scientific papers published in peer-reviewed journals that include results and/or images acquired with a WITec microscope. Scientists from all over the world are invited to submit their research published (in print or online) during the current year.

The use of a WITec microscope should be clearly documented in the article itself or its supporting information. Publications co-authored by a WITec employee are not eligible for a WITec Paper Award.

Any co-author can submit a paper and will receive a WITec giveaway as a thank you present. Each article can however only be submitted once.

Publications from the current year can be submitted until January 31st of next year.

A WITec jury will evaluate the submitted papers in terms of scientific relevance, data quality and the level of instrument feature utilization to determine the winners. The first author(s) of the three winning publications will receive Amazon™ gift cards as prizes: 500 EUR, 300 EUR and 200 EUR for the Gold, Silver and Bronze Awards, respectively.

HOW TO CONTRIBUTE:

01 Send your paper(s) in PDF format to papers@witec.de. Include the supplementary information (if applicable) and your full contact information.

02 Receive a WITec thank you gift. Please include your preferred shipping address with your submission to receive the present.

03 Await the results of the WITec Paper Award competition.
